Satyam Kumar

Curriculum Vitae

C211 / 9 IIT Kanpur
Kanpur U.P. - 208016, India
(+91) 817 598 9684
satyamk@iitk.ac.in
home.iitk.ac.in/~satyamk

Interests

Brain-Computer Interfaces, Machine Learning, Reimannian Geometry, Signal Processing

Education

2013–2018 **Indian Institute of Technology Kanpur**, *Integrated BTech - MTech Electrical Engineering*, GPA: 8.67/10.

2012 **Modern Senior Secondary School**, Kota, Rajasthan, Percentage: 85%.

2010 **Modern Senior Secondary School**, *Matriculation*, Kota, Rajasthan, GPA: 8.6/10.0.

Publications

Jun'18 **Kumar, S.**, Reddy, T., Behera, L., EEG based Motor imagery classification using instantaneous phase difference sequence , Manuscript **accepted** for publication in IEEE conference on Systems, Man and Cybernetics, 2018

Jul'18 Tharun Kumar Reddy, Vipul Arora, **Satyam Kumar**, Laxmidhar Behera, Y K Wang, CT Lin, "Electroencephalogram based reaction time prediction with Diferential Phase Synchrony representations using co-operative multitask learning Deep Neural Networks" **submitted** to special issue at IEEE transactions on Emerging topics in Computational Intelligence (Id: TETCI-2018-0173)

Masters Thesis

Aug'17 – Feb'18 **Enhancing the classification accuracy of motor imagery brain computer interface**.
Prof. Laxmidhar Behera (*IIT Kanpur*) & **Prof. Roger Gassert** (*ETH Zurich*, Switzerland)

- Analyzed differnt phase synchrony statistics during motor imagery
- Implemented and compared common spatial pattern (**CSP**) algorithm with **Lasso** regularlised sparse filter bank approach (**SFBCSP**) on BCI competition datasets
- Formulated novel approach based on instantaneous phase difference sequences to extract phase synchrony information
- The approach beats published results that use single trial phase locking value on BCI competition IV dataset IIa. When combined with complementary power features, the classification accuracies are further increased

Mar'18 – Jul'18 **Subspace analysis in motor imagery brain computer interface**.
Prof. Laxmidhar Behera (*IIT Kanpur*)

- Implemented stationary subspace analysis and divergence based framework of common spatial pattern algorithm for binary class
- Extended the binary class divergence framework to classic OVR divergence framework for multiclass motor imagery
- Proposed a novel framework for optimization of stationarity in multiclass motor imagery BCI using an information theoretic interpretation of JAD

Research Experience

Sep'18– Ongoing **Adaptive Reimannian approaches in Brain computer interface**.
Prof. Fabien Lotte (*INRIA Bordeaux, France*)

Aug'16 – Dec'16 **Imagined speech classification Using EEG Signals** .
Prof. Laxmidhar Behera (*IIT Kanpur*)

- Designed the experimental paradigm and recorded EEG signals of participants, imagining 2 phonemes: "ba" and "ku"
- Applied two broad approaches for classifying the signals:1) Matricization of the input tensor followed by dimensionality reduction and feature extraction, and 2) **Tensor decomposition** of the input tensor
- Standard classifiers like LDA, SVM, kernel SVM used for binary classification

May'16 – July'16 **Optimization of electrode positions in Different Brain Computer Interfaces**.
Prof. Francesco P. Andriulli (*Telecom Bretagne, France*)

- Studied different forward and inverse methods deployed for EEG source localisation in human brain model
- Explored epilepsy and epileptic seizures occurring in Human Brain Using **Para-View**, **MATLAB** and learnt about different channel selection algorithms.
- Proposed and implemented the **Genetic algorithm** to simultaneously optimise channel selection and classification performance of Motor imagery BCI.

Jan'16 – May'16 **Eye blink classification Using EOG signal** .
Prof. Laxmidhar Behera (*IIT Kanpur*)

- Designed the experimental setup and recorded EOG signals of the subjects performing voluntary eye movements
- Performed the feature extraction using spectral and temporal characteristics of EOG signals
- Softmax and SVM's were used for classification

Relevant Works

Aug'17 **Image generation through variational autoencoders** .
Implemented variational autoencoder archtitecture in tensorflow on MNIST database to generate image of digits

Jun–Jul'17 **Dimensionality reduction using Autoencoders for classification of P300**.
Used Denoising Autoencoders on *EPFL's* publicly available dataset to generate a sparse representation of P300 signals and further classified them using Softmax and LDA classification algorithms

Apr'17 **Classification of Hand written digits using Multi-layer perceptron**, *Prof. Laxmidhar Behera*.
Wrote a MATLAB model of Restricted boltzmann machine for classification of hand written digits

Mar'17 **Personalization of HRTF from anthroprometric features** , *Prof. Rajesh M. Hegde*.
Compared **Isomap** and **PCA** dimensionality reduction techniques on full and intraconic Head related transfer function. Multi layer perceptron was used for learning the anthroprometric features extracted from CIPIC databse

Mar'17 **Human cognitive processes**, *Prof. Devpriya Kumar*.
Wrote a term paper on brain computer interfaces and its uses

Feb'17 **Bio-informatics and computational biology**, *Prof. Nitin gupta* .
A report on reliability of DNA fingerprinting in criminal conviction

Nov'16 **Neurobiology**, *Prof. Nitin gupta* .
A report on analysis of lateralisation of human intelligence in cortex

Relevant Courses

Electrical Engineering: Neural networks | Speech signal processing | Control systems | Basic of modern control systems | Digital control | Control system laboratory | Signal systems & networks | Digital signal processing | Electromagnetic theory

Mathematics: Fundamental of computing | Probability & statistics | Linear algebra | Complex variables | Detection and estimation theory | Numerical methods in engineering | Bayesian machine learning

Biology: Introduction to biology | Neurobiology | Computational biology and bio-informatics | Human cognitive processes

Technical Skills

Advanced	MATLAB
Intermediate	Python | LaTeX| AutoDesk Inventor| Paraview | EEG Setup
Basic	C| Tensorflow| Arduino| Android Studio| Microcap

Teaching Experience

Ongoing	**Microelectronics Laboratory, EE381A**
Aug-Oct'17	**Control System Laboratory, EE380A**

Academic Achievements

Aug'18	**Travel Grant** winner, IEEE conference on Systems, Man and Cybernetics
Aug'17	**Teaching assistant fellowship**, awarded by Ministry of Human Resource Development, India on the basis of academic performance.
Apr'16	**Charpak research Scholarship**, one of the 25 recipients from India.
Mar'16	**Internship Offer, Qualcomm India**
Nov'14	**Overall Best Project award**, *Course project for TA-201*, Received the award for building a windmill driven pump
Jun'13	**JEE Advanced** All India Rank 679, *(top 99.993 percentile)*
Jun'13	**Youngest ever across India to clear JEE advanced**
May'13	**JEE Mains** Score: 292/360 (top 99.993 percentile)

Test Scores

GRE	Total: 322/340| Quantitative: 170/170| Verbal: 152/170| Analytical Writing: 3/6
TOEFL	Total: 105/120| Listening: 29/30| Reading: 27/30| Writing: 26/30| Speaking: 23/30
