Research Interests

Brain-Computer Interfaces, Machine Learning, Riemannian Geometry, Signal Processing

Education

2013–2018 **Indian Institute of Technology Kanpur**, *Integrated BTech - MTech Electrical Engineering*, Master's GPA: 8.67/10 | Undergrad GPA: 7/10.

2012 **Modern Senior Secondary School**, Kota, Rajasthan, Percentage: 85%.

2010 **Modern Senior Secondary School**, *Matriculation*, Kota, Rajasthan, GPA: 8.6/10.0.

Publications

1. **Kumar, S.**, Reddy, T., Behera, L., *"EEG based Motor imagery classification using instantaneous phase difference sequence"*, **Accepted** for oral presentation at IEEE conference on **Systems, Man and Cybernetics, 2018**

2. Tharun Kumar Reddy, Vipul Arora, **Satyam Kumar**, Laxmidhar Behera, Y K Wang, CT Lin, *"Electroencephalogram based reaction time prediction with Differential Phase Synchrony representations using co-operative multitask learning Deep Neural Networks"* **Accepted** for publication in Special issue on New Advances in Deep-Transfer Learning, **IEEE Transactions on Emerging topics in Computational Intelligence** (Id: TETCI-2018-0173)

Masters Thesis

Aug'17 – Feb'18 **Enhancing the classification accuracy of Motor Imagery Brain-Computer Interface**. **Prof. Laxmidhar Behera** (*IIT Kanpur*) & **Prof. Roger Gassert** (*ETH Zurich*, Switzerland)

- Analyzed differnt phase synchrony statistics during motor imagery
- Implemented and compared common spatial pattern (**CSP**) algorithm with **Lasso** regularized sparse filter bank approach (**SFBCSP**) on BCI competition datasets
- Formulated novel approach based on instantaneous phase difference sequences to extract phase synchrony information
- The approach beats published results that use single trial phase locking value on BCI competition IV dataset IIa. When combined with complementary power features, the classification accuracies are further increased

Mar'18 – Jul'18 **Subspace analysis in Motor Imagery Brain-Computer Interface**. **Prof. Laxmidhar Behera** (*IIT Kanpur*)

- Implemented stationary subspace analysis and divergence based framework of common spatial pattern algorithm for binary class
- Extended the binary class divergence framework to classic One-versus-Rest divergence framework for multiclass motor imagery
- Proposed a novel framework for optimization of stationarity in multiclass motor imagery brain-computer interface using an information theoretic interpretation of Joint Approximate Diagonalization

Research Experience

Sept'18– Ongoing **Adaptive Riemannian approaches in Brain Computer Interface**. **Fabien Lotte** (*INRIA Bordeaux, France*) & **Prof. Florian Yger** (*Université Paris-Dauphine, Paris*)

- Implemented state of the art Riemannian Geometry Algorithms for classification of motor imagery BCIs
- Implemented the classical adaptive algorithms based on CSP for supervised and unsupervised adaptation
- Proposed several different frameworks for doing adaptation using riemannian geometry classifiers. The initial results has been submitted for review to a conference.

Aug'16 – **Imagined speech classification Using EEG Signals** .
Dec'16 **Prof. Laxmidhar Behera** (*IIT Kanpur*)

- Designed the experimental paradigm and recorded EEG signals of participants, imagining 2 phonemes: "ba" and "ku"
- Applied two broad approaches for classifying the signals:1) Matricization of the input tensor followed by dimensionality reduction and feature extraction, and 2) **Tensor decomposition** of the input tensor
- Standard classifiers like LDA, SVM, kernel SVM used for binary classification

May'16 – **Optimization of electrode positions in Brain-Computer Interfaces**.
July'16 **Prof. Francesco P. Andriulli** (*Telecom Bretagne, France*)

- Studied different forward and inverse methods deployed for EEG source localization in the human brain model
- Explored epilepsy and epileptic seizures occurring in Human Brain Using **Para-View**, **MATLAB** and learned about different channel selection algorithms.
- Proposed and implemented the **Genetic algorithm** to simultaneously optimize channel selection and classification performance of Motor imagery BCI.

Jan'16 – **Eye blink classification Using EOG signal** .
May'16 **Prof. Laxmidhar Behera** (*IIT Kanpur*)

- Designed the experimental setup and recorded EOG signals of the subjects performing voluntary eye movements
- Performed the feature extraction using spectral and temporal characteristics of EOG signals
- Softmax and SVM's were used for classification

Awards and Honors

Aug'18 **Travel Grant** winner, IEEE conference on Systems, Man and Cybernetics

Aug'17 **Teaching assistant fellowship**, awarded by Ministry of Human Resource Development, India on the basis of academic performance.

Apr'16 **Charpak research Scholarship**, one of the 25 recipients from India.

Nov'14 **Overall Best Project award**, *Course project for TA-201*, Received the award for building a windmill driven pump

Jun'13 **JEE Advanced** All India Rank 679, *(top 99.993 percentile)*

Jun'13 **Youngest ever across India to clear JEE advanced**

Relevant Works

Aug'17 **Image generation through Variational Autoencoders** .
Implemented variational autoencoder architecture in tensorflow on MNIST database to generate image of digits

Jun–Jul'17 **Dimensionality reduction using Autoencoders for classification of P300**.
Used Denoising Autoencoders on *EPFL's* publicly available dataset to generate a sparse representation of P300 signals and further classified them using Softmax and LDA classification algorithms

Apr'17 **Classification of handwritten digits using Multi-layer perceptron**, *Prof. Laxmidhar Behera*.
Wrote a MATLAB model of Restricted Boltzmann machine for classification of handwritten digits

Mar'17	**Personalization of HRTF from anthropometric features** , *Prof. Rajesh M. Hegde*. Compared **Isomap** and **PCA** dimensionality reduction techniques on full and intraconic head related transfer function. Multi-layer perceptron was used for learning the anthropometric features extracted from CIPIC databse
Mar'17	**Human cognitive processes**, *Prof. Devpriya Kumar*. Wrote a term paper on brain-computer interfaces and its uses
Feb'17	**Bio-informatics and computational biology**, *Prof. Nitin Gupta* . A report on the reliability of DNA fingerprinting in criminal conviction
Nov'16	**Neurobiology**, *Prof. Nitin Gupta* . A report on the analysis of lateralization of human intelligence in cortex

Relevant Courses

Electrical Engineering	Neural networks	Speech signal processing	Control systems	Basic of modern control systems	Digital control	Control system laboratory	Signal systems & networks	Digital signal processing	Electromagnetic theory
Mathematics	Fundamental of computing	Probability & statistics	Linear algebra	Complex variables	Detection and estimation theory	Numerical methods in engineering	Bayesian machine learning
Biology	Introduction to biology	Neurobiology	Computational biology and bio-informatics	Human cognitive processes

Technical Skills

Advanced	MATLAB
Intermediate	Python	LaTeX| AutoDesk Inventor| Paraview	EEG Setup
Basic	C| Tensorflow| Arduino| Android Studio| Microcap

Teaching Experience

Jan-April'18	**Microelectronics Laboratory, EE381A**
Aug-Oct'17	**Control System Laboratory, EE380A**

Test Scores

GRE	Total: 322/340| Quantitative: 170/170| Verbal: 152/170| Analytical Writing: 3/6
TOEFL	Total: 105/120| Listening: 29/30| Reading: 27/30| Writing: 26/30| Speaking: 23/30
